

EASY-TO-USE

CONSISTENT QUALITY INPUT

TRACEABILITY OF ALL PRODUCTS

30 YEARS OF R&D

CANNA is the premier provider of nutrient and cultivation solutions for **fast-growing crops**. With decades of experience and a deep understanding of growers' needs, we pride ourselves on offering user friendly **complete feeding solutions**. We recognize the vital role of clean, consistent, and **traceable inputs**, all while keeping things simple. Trust CANNA, a leader in the industry for over 30 years, to deliver on our promise that

QUALITY PROVES ITSELF!

OPTIMIZED FEEDING SOLUTIONS

COST-EFFECTIVE

CANNA provides premium products at market-competitive prices. By following our precise feeding recommendations tailored to each of our fully compatible product lines, you'll discover that our offerings ensure superior results without overspending.

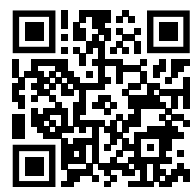

TECHNICAL GROWING SUPPORT

Our team will go the extra mile to support your operation and processes. We strive to assist in getting you the highest quality results by providing a cost-efficient input, every crop cycle. Licensed Cultivators get direct access to company, product and specific batch information for Quality Assurance purposes.

SIGN UP to our database and you will find labels, SDS, Quality Control Certificates and Batch Analysis to stay on top of compliance Regulations, and ultimately one less thing to worry about.

EASY AS 1 - 2 - 3

CANNA fertilizers are specifically tailored for your selected substrate, empowering you to feed your plants with precisely what they require to thrive and unlock their full potential!

1

YOU CHOOSE THE **SUBSTRATE** FOR THE GROW

CANNA substrates are manufactured to meet rigorous international RHP certification standards. Sourced from superior quality ingredients, our substrates deliver exceptional results.

2

CANNA BASE FERTILIZERS PROVIDE ALL CORRESPONDING NUTRIENTS

Complete base nutrient lines specifically crafted to integrate with your growing system. Our proven formulas result in consistent and quality crops for large scale cultivation.

3

CANNA ADDITIVES SERVE AS PLANT ENHANCEMENTS

Improve the overall health of your plants, producing a more optimal end result. Compatible with all fertilizer lines, our additives offer specific enhancement throughout the grow cycle.

QUALITY NUTRIENTS & SUBSTRATES

CANNA COCO A & B

2-part fertilizer for the entire growth cycle, specifically designed for the unique characteristics of Coco substrates like CANNA Coco Professional Plus and CANNA Coco Flex.

CANNA TERRA VEGA - TERRA FLORES

One part fertilizer for each vegetative and flowering phases, designed for fertile, well limed quality soils like CANNA Terra Professional Plus.

CANNA SUBSTRA VEGA A & B CANNA SUBSTRA FLORES A & B

2-part fertilizer for both vegetative and flowering stages. Designed for usage on inert growing medium like rockwool in run-to-waste systems.

CANNA AQUA VEGA A & B CANNA AQUA FLORES A & B

2-part fertilizer for each vegetative and flowering stages, specifically designed for recirculating systems and cultivation on clay medium.

CANNA PEAT MIX A & B

2-part fertilizer for the entire plant life cycle specifically designed for growing on Canadian peat mixes.

CANNAZYM - CANNA RHIZOTONIC XP - CANNA PK13/14 - CANNABOOST

CANNA ROOTPLUGS

The perfect solution for rapid & vigorous cutting and seedling rooting! CANNA Rootplugs are crafted for seamless integration with natural substrates. They absorb water rapidly, maintain precise humidity levels and make for easy transplanting. Fully compostable and packaged dry for a longer shelf life!

GLOBAL PIONEER SINCE '93

CANNA supplies cultivators from all over the world with products that easily align with their growing systems. By continuously looking into plants, growing conditions and crop specific needs, we are able to offer not only the right products, but also the technical support that every grower requires to optimize their cultivation.

With three unique R&D facilities globally, CANNA is able to keep track of market developments and test all our products and respective growing techniques first before launching to the market.
